Experience

VIZIENT, INC.

Software Engineer (full-stack)

Cape Girardeau, MO

July 2022–present

Associate Software Engineer (full-stack)

April 2021–June 2022

- Deliver high priority features for a web application handling contract management for a GPO with members encompassing over 90% of the nation's hospital groups
- Work together with a hybrid scrum/XP team to timely and efficiently complete deliverables using agile methodologies
- Address production bugs and prioritize hot fixes through the CI/CD pipeline to continually optimize user experience
- Lead production deployments, communicating with infrastructure team to ensure smooth execution of change requests
- Onboard and mentor new engineers in growing their programming skills and codebase knowledge
- Utilize Angular for front-end development, creating reusable components and implementing responsive design
- Implement backend services and REST APIs using Spring Boot and Java
- Create database queries and migrate relevant data for new project database
- Build solutions for importing and exporting of data using various formats (e.g. XML, JSON, CSV)
- Refactor existing code to improve performance, maintainability, and scalability of application
- Maintain a high standard of test-driven development (TDD) to provide robust test coverage across the entire stack
- Monitor and debug production issues via Microsoft Azure Portal

CENET (CULTURAL EXCHANGE NETWORK)

Program Director

Cape Girardeau, MO

August 2018–March 2021

- Revitalized and streamlined new job placement process of international exchange participants
- Led bi-weekly external relations meetings with senior management
- Presented new placement program to potential partners at domestic networking events and conferences
- Performed regular user acceptance testing of internal CRM application and ran reports to analyze trends across programs

Additional Activities

YOUTH CODING LEAGUE

Technical Merit Judge

Cape Girardeau, MO

November 2021-present
